

MASUNGI
— GEORESERVE —

Weddings and Celebrations Catalog

A MESSAGE FROM THE PROJECT MANAGER

Warm greetings,

Masungi Georeserve is our little piece of paradise born out of twenty years of restoration and love. It has become a sanctuary for all of us, a witness to some of our best and happiest moments, and a conservation project that has taught us much about ourselves and the life around us.

We are thrilled to finally share with you this place filled with some of our most wistful memories. We hope that by celebrating your special day with us, you will come to see it as your own magical place, too.

As a conservation area, we welcome intimate and minimalist celebrations that are as much about the harmonious marriage of nature and man as they are about the union of two souls and two families.

Celebrants are expected to ensure the georeserve policies are observed by all guests, aides, and suppliers.

Smoking, littering, rowdy behavior, vandalism, disruption of plant and animal life, among others, are strictly prohibited.

As stewards of the georeserve, our park rangers will be implementing these policies and their corresponding penalties strictly during the event.

We also hope that you consider avoiding single-use plastics and other wasteful materials and activities.

We believe that the most memorable celebrations are those that are focused on what matters the most—surrounded by your closest family and friends, and enveloped in the natural, timeless elegance of nature.

Yours,

Ann Dumaliang

Silayan

Silayan is a revitalised hilltop hut that boasts of sublime 360-degree views of the Masungi limestone pinnacles, Laguna de Bay, Sierra Madre mountain range, and Metro Manila skyline.

It also features an al fresco dining area, a small open space for outdoor ceremonies, and a reflection pond. Silayan is recommended for intimate rustic or garden weddings.

Silayan's design elements are handcrafted with love and passion by craftsmen. Using sustainable resources found within the georeserve, such as reclaimed timber from fallen trees, bamboo culms, and cogon grass, they have turned remnants of nature into works of art that are elegantly Filipino.

Pine Patch

The Pine Patch just below Silayan is home to an open field and two (2) glass huts. The open field may be used for outdoor ceremonies and/or receptions.

Located in the area is Tipunan, an indoor glass hut with glass walls and a cogon rooftop. Adjacent to it is Dasalan, featuring a soaring canopy, amphitheater-style seats, and elegant glass walls surrounded by mango trees.

NOTE: Tipunan and Dasalan are currently undergoing maintenance. Venues will be available again on June 2021.

Rock Garden Events Hall

The Rock Garden is home to rock formations, serene paths, and a small stream during the rainy season. It also features an open-air Events Hall for simple and low-impact gatherings.

Cabin

The Cabin is well-suited to be the groom's preparation room, together with two of his best men. Surrounded by lush greenery and a serene view, the Cabin is strategically placed near the Mountain House for easier coordination between the bride's and the groom's party.

Mountain House

The Mountain House is a rustic two-bedroom suite that functions as the bride's preparation room. It also has a cozy attic and a spacious common area where the rest of the entourage or close family members may stay before the ceremony.

Native Tree Ceremony

As part of Masungi Georeserve's conservation advocacy, we host a symbolic native tree ceremony to commemorate each couple's wedding day. In this unique activity, the bride and the groom may contribute to the continued protection and reforestation of the denuded mountains surrounding the Georeserve by nurturing a native tree seedling together, which will be planted in the Masungi Geopark Project's reforestation site.

Catholic Weddings

The Nuestra Señora de la Annunciata Parish or Boso-Boso Church is located approximately 10 to 15 minutes away from Masungi Georeserve.

The parish boasts of a rich past, having been first created as a mission church by the Jesuits in the 1700's. It now stands in the grandeur of old stone with wild vines and plants growing on top of the church. This is recommended for those who want to have a Catholic Church wedding ceremony.

While we may accommodate Christian wedding ceremonies in our venues, it is best to contact Nuestra Señora de la Annunciata Parish for all Catholic wedding ceremonies.
